# Real Sector & Inflation

Inflation, as measured by the change in the Colombo Consumers' Price Index (CCPI) (2006/07=100), which is computed by the Department of Census and Statistics, decreased to 2.1 per cent in December 2014 compared to 4.7 per cent in December 2013 on a year-on-year basis. Annual Average inflation which followed a declining trend for nineteen consecutive months reached 3.3 per cent in December 2014 from 6.9 per cent in December 2013.

Core inflation, which captures underlying long-term trend of inflation, decreased from 4.4 per cent in December 2013 to 3.5 per cent in December 2014 on an annual average basis. The year-on-year core inflation, which showed a mixed movement with low volatility, increased from 2.1 per cent in December 2013 to 3.2 per cent in December 2014.

The economy continued its growth momentum by recording a 7.7 per cent growth in real terms during the third quarter of 2014, supported by the 12.6 per cent growth of the Industry sector and 7.0 per cent growth of the Services sector, albeit the Agriculture Sector contracted by 2.0 percent.

While the production of tea recorded an increase of 0.9 per cent during January to November 2014, the rubber production showed a decline of 20.4 per cent during the same period. Meanwhile, the coconut production recorded an increase of 12.4 per cent during January to October 2014.

The FIPI increased significantly by 12.4 per cent on year-on-year basis in September 2014. This growth was mainly facilitated by increased production of beverages, wearing apparel as well as chemical and chemical products sectors. They have recorded a significant growth of 18.2, 23.6 and 23.5 per cent due to increased domestic and international demand during this period.

During the week crude oil spot prices showed mixed performance. In the beginning of the week prices fell to the lowest levels since April 2009, due to weakening demand in Europe and Asia, while refineries in Philadelphia and Ohio were hit by fires over the weekend, curtailing demand for crude oil. Price declines were further supported after Goldman Sachs warned that prices would fall further and Gulf oil producers showed no sign of cutting output. Goldman Sachs slashed its three-month forecasts for Brent to \$42 a barrel from \$80 a barrel, saying fuel prices needed to stay low for much longer in order to curb production and end a global supply glut. They also cut its outlook for the U.S. futures contract to \$41 a barrel from \$70 a barrel. However, towards the end of the week prices rose amid a shaky demand outlook, after traders with expiring options bought back futures.

## External Sector

During the year so far (up to 16 January 2015) the rupee depreciated against the US dollar (0.03 per cent). Given the cross currency exchange rate movements, the Sri Lanka rupee appreciated against the euro (4.50 per cent), pound sterling (2.51 per cent) and depreciated against the Japanese yen (2.81 per cent) and the Indian rupee (2.11 per cent) during this period.

Earnings from exports declined by 13.7 per cent, year-on-year, in October 2014 to US dollars 899 million, reversing the increasing trend recorded since June 2013, mainly due to the base effect. Both the highest monthly export earnings and the lowest monthly import expenditure for the year 2013 were recorded during the month of October. The largest contribution to the decline in exports in October 2014 was from the industrial exports followed by agricultural exports. However, on a cumulative basis export earnings increased by 9.7 per cent to US dollars 9,187 million during the first ten months of 2014. Major export destinations during January to October 2014 were USA, UK, Italy, India and Germany accounting for around 50 per cent of total exports.

Expenditure on imports increased by a higher rate of 25.6 per cent to US dollars 1,750 million in October 2014, while on a cumulative basis, imports grew by 7.3 per cent to US dollars 15,972 million during the first ten months of 2014. The increase in import expenditure in October 2014 was driven by the significant increase in imports of all major categories, specially intermediate goods. During the first ten months of 2014, the main import origins were India, China, UAE, Singapore and Japan accounting for about 58 per cent of total imports.

The increase in import prices over the decline in export prices resulted to deteriorate the terms of trade in September 2014. The import price index increased by 1.6 per cent, year-on-year, to 98.4 index points mainly due to the decrease in the average price level of intermediate goods. Meanwhile, export price index declined by 3.6 per cent to 106.0 index points, reflecting the decline in prices of all major categories. Accordingly, the terms of trade index deteriorated by 5.1 per cent to 107.8 index points in September 2014 from to 113.6 index points in September 2013.

India, UK, China, Germany and Maldives were the top five sources of tourist arrivals upto December 2014, accounting for 46.1 per cent of total tourist arrivals during the year upto December 2014.

The average price of tea in the Colombo auction decrease in October 2014 compared to the corresponding month of 2013, but the prices averaged at Colombo Auction is higher than the prices at other two auctions namely Kolkata and Mombasa, due to higher demand for Ceylon tea.
